Observations and Future Plans

In reviewing our outpatient services, we identified the need to distinguish between clients seen only in the ER and those who were active MHR clients. Currently, these numbers are combined. We also plan to improve the consistency of discharge data across all programs, ensuring each program utilizes the same definitions and provides a discharge summary. The Quality Improvement (QI) Department will work to streamline these processes and create annual reports for each program to ensure clear and accurate reporting.

We aim to develop a consistent tracking system for housing services to monitor how many individuals are referred to housing programs that successfully secure housing. Additionally, we will improve the tracking of group participation and explore features in our Electronic Health Records (EHR) system to capture this data more effectively.

Crisis Information

Fiscal Year 2023-2024

Total Agency Crisis: 999

Total Agency Crisis Admissions: 377

Total Agency Crisis Releases: 622

Feedback from Persons Served

Surveys were given to clients in October 2023, with 261 surveys given and received.

Client Satisfaction Surveys

Observations and Future Plans

Overall, feedback from our recent survey was very positive, with several staff members receiving special recognition. One area of concern highlighted was the open access scheduling system, with clients noting difficulties in securing appointments with therapists.

Spanish versions of the survey were provided for our Spanish-speaking clients, ensuring inclusivity.

We have integrated the survey into our Electronic Health Records (EHR) system, although they are currently completed on paper and manually entered into our system. Looking ahead, MHR is implementing a client portal, with the goal of enabling clients to access and complete future satisfaction surveys online through the portal.

BUSINESS FUNCTION

Data Project

- MHR continues to work on the NM Data Project, tracking certain data to report to the state to help gather information about treatment effectiveness and to be used in a statewide Health Information Exchange (HIE). We have continued participating in this program and have streamlined much of the process to function smoothly.

CARF

- MHR continues to maintain its CARF Accreditation. We will have our next Survey in Summer 2025.

Certified Community Behavioral Health Clinic (CCBHC)

- MHR became Provisionally Licensed as a CCBHC earlier in 2024. MHR is currently working with the state of New Mexico to determine which changes need to be made within the organization and can begin to plan how we will make those changes. The goal to have this implemented is January 2026.
